Best leader at MSP-Tech Club presentation for Builders & Developers workshop.

2016 - 2016 Participant
GDG DevFest 2016
Attended Google DevFest Event in the Smart Village
Participated in Android workshop.

Skills

iOS Development

My current interest, learning new everyday and currently working as iOS developer at ACE.

C#

I used it more than once to develop desktop applications. I also used in Xamarin Development.

Java

Started learning Java basics and syntax, its syntax is very similar to C# so it is very easy till now.

C++

The language I study in college.

Xamarin

Not interested in developing mobile applications using Xamarin anymore, but still I have a fair knowledge concerning Xamarin.

SQL

The desktop applications I developed with C# had a SQL database so I had to deal with SQL regularly.

HTML / CSS

I used XAML while working with Xamarin then used HTML / CSS for a group project in college and I found myself familiar with markup languages.

RESTful APIs'

Used RESTful API's to deliver an assignment in college

Portfolio

I worked on 3 applications till now, front-end only, the screenshots are attached to the links below.

I have a fair knowledge with back-end but I didn't work on any app concerning the back-end. Till now my work is just front-end.

The first and second applications I worked on at ACE but no published apps yet.

The third app is a freelance project that I'm currently working on and as you can see, the UI isn't finished yet.
