## SKILLS

C++

java SE

C

Spring Boot(java framework)

HTML

CSS

Bootstrap

JQuery(on hand)

php

## LANGUAGES

Arabic

English

# Abdulalem Alshaibani

Software engineer

I'm a Software Engineer with demonstrated history of proficient work with deep interest in code design, problem solving, and database design.

## EDUCATION

### Computer Science

Student 3rd year(Faculty of Computers and Information) major (CS department)

09/2016 – 06/2020

#### Courses

- Data Structure
- Database
- Software Engineering 1&2
- OS 1&2
- AI
- OOP
- File Organization
- Internet Technology
- Algorithm
- Computer Architecture and Organization

## PERSONAL PROJECTS

### 3QARY (11/2018 – 01/2019)

- Built with PHP as backend.
- HTML, CSS and Bootstrap, as Frontend.

### E\_learning website (02/2019 – Present)

- Using (Spring Boot) as Backend.
- Html, CSS, Bootstrap 4, JQuery as Web Frontend.
- Using Agile Methodology.

### Hospital (Desktop application) (03/2018 – 05/2018)

- Simple Hospital Management Desktop Application using C# and SQL SERVER.

### MASROKA (11/2018 – 01/2019)

- Built with (java SE)
- It's a console application that simulates the situation found by accident a personal id for someone you don't know, by making a post and if you the one who lost his id you can claim it by answering a question that ensures that you are the owner.
- MVC design pattern.

### Supermarket Simulation (11/2017 – 12/2017)

- Built with(c++).
- A supermarket contains a set of grocery items and has a set of customers that can buy these grocery items. In addition, a supermarket has a stock and an administrator who can enter the grocery items into the stock.

### Linux simulation project (OS) (11/2018 – 12/2019)

- Using java SE
- An operating system interfaces with a user through a Command Line Interpreter (CLI). A CLI is a software module capable of interpreting textual commands coming either from the user's keyboard or from a script file. A CLI is often referred to as a shell.

### A Lot of project in java , c++ and c

- LZ77 , LZ78 ,LZW ,Standard\_Huffman ,Vector\_Quantization ,PredictiveFeedForward ,Non\_Uniform\_Scalar( all built using java with GUI).
- Vending machine and Mini Social application built with C++.
- Election process using c (MPI).

## KEY SKILLS:

Problem solving abilities.

Ability to learn new technologies.
