Third year student

Summary

I'm very good at **Python, R, SQL, Business Intelligence, C++, English** and passionate in **data science**. I had **2 internships in analytics and networking**. I'm a **soft skills moderator in Microsoft student partner** ; however, **my flexibility, tendency to learn new things and hard working are the best of me in this period as there are a lot to learn**. I am seeking a company that is working in data science where I can transform my knowledge into experience and solve the real life problems it meets to get the practical flavor.

Training

5/8/2018 - 6/9/2018

Summer internship

National bank of Egypt

The internship gave me experience in some areas of **Data analytics** such as data warehousing, using oracle SQL in ad hoc reports and exploratory analysis also how to visualize the results with "oracle data visualization" to be able to take a decision or solve a problem. Also an important impact from the internship was **flexibility**.

1/7/2018 - 1/8/2018

Summer internship

Advanced Computer Technology

i have learned getting real tasks for installing windows server to a client and handling all the stuff from creating groups, OU, permissions, creating additional DCs with high availability and also virtualization with hyper-V, VMware and a good background in network basics. This **engagement** with the company system and engineers taught me how to fit in companies atmosphere and stick to the their rules.

Education

2016 - 2020

Decision support and operations research

Faculty of Computers and Information at Cairo University

GPA: 2.83 (Very Good)

Area of Expertise

Data Science

R, Python, visualization, Excel and data wrangling

Data basses

Microsoft SQL and ERD

C++

OOP, data structures, files and problem solving

English

fluent

Extra activities

Soft skills instructor at Microsoft student partner Cairo university. This position transcended my personal skills.

hobbies and interests

Reading, public speaking, charity and exploring new things.
