Third year student

Summary

I'm good at C++, C#, python, java, octave, SQL and nowadays learning asp.net web Api ; however, my flexibility, tendency to learn new things and hard working is the best of me in this period as there is a lot to learn. I am seeking a company where I can use my knowledge in the real life problems it meets and show them my abilities in order to be qualified and experienced.

Projects

C# desktop projects : The first project was a program for a warehouse that handle all the transactions that are needed and i have learned how to make a big project and be organized, making the data base from the scratch and using the stored procedure in queries. The second was a prototype for an app that connect the people who lost items with those who found them and i have learned the software engineering basics (SOLID principles, clean code and some design patterns).

Asp.Net web REST API : working this semester on project that apply microservices architecture by asp.net web api .

OOP with C++ project : simulating a vending machine just to practice the OOP principles .

Education

2016 - present Computer science
Faculty of computers and information at Cairo univesity
GPA = 3.18

Area of Expertise

c#	<div><div></div></div> Desktop apps
SQL	<div><div></div></div> and ERD also
Java, c++, python	<div><div></div></div> OOP, Data structures, Files and algorithms
Problem solving	<div><div></div></div> ACM

Hobbies

Problem solving and Math
