CAREER OBJECTIVE

- As a recent graduate, programming lover, I am eager to build a long-term career in the field of computer science and learn as much as possible its branches that dominate the software market over the world. Now I am focusing on mobile development.

EDUCATION

Faculty of Computers and Information Cairo University   2019

Information Technology Department

PROJECTS

- **Agricol**

  It is my graduation project, we applied the concept of "Internet of Things" in the field of agriculture using a platform called "Fiware".

- **The projects of the courses of udacity android nanodegree for beginners**

  User interface, user input, multiscreen, networking, data storage.

- **Biological**

  A c++ project to help biologicals manipulate the types of DNA, RNA, Protein and vice versa.

- **cyber security and text compression/decompression algorithms in java**
  DES, AES, RSA, LZ77, LZW, vector quantization, and standard Huffman.

- **Some computer vision and pattern recognition algorithms in matlab**

  Canny detector, hough, panorama stitching, Centroid, PCA, NN, and K-mean clustering.

SKILLS

Technical Skills

- C++ Programming, Java Programming, Matlab Programming.

- OOP, Data Structures, HTML, CSS, Android.

Language Skills

- Arabic (native), English (very good).

Other Skills

- Good verbal and written communication skills

- Motivated and always willing to learn new things

- Collaborative and able to work in teams or groups

- Friendly and make friendships easily

- I was a PR member in a student activity called "Feꦉra".
